

GAS BOTTLE TROLLEY
MOBILITY OF YOUR PACKAGING STATION

The Ripack gas bottle trolley is an essential accessory for moving around your shrinking equipment safely and ensuring your equipment lasts.

A quality job also depends on the Ripack accessories you use.

For unstable loads, it is sometimes necessary to go to the load. Thanks to the Ripack gas bottle trolley, you can easily move your shrinking equipment.

In some production areas, sometimes loads that need to be shrink-wrapped are not all in the same place. This is another advantage of this completely portable solution.

Its design means it fits the bottle securely and its pole helps you manage the hose.
