

Application of the month #2

# Vinyl Records

## Pratika MPE X1

The Pratika 56 MPE X1 is an automatic shrink-wrapping machine designed with careful consideration for market needs, aiming to provide a technologically advanced, versatile, and easy-to-use solution.

## Discover the Pratika MPE X1 automatic shrink-wrapping machine

The Pratika MPE X1 is a **fully electric** and **servo-assisted** automatic packaging machine, equipped with a 600x400mm sealing bar capable of packaging products up to 160mm in height.

Enhanced by a combination of **high-level** electronic, mechanical, and technological components, this packaging machine features a double door and a range of optional features that **make it suitable for any requirement**.

## Product details

31,5 x 31,5cm

245g

da 0,3 a 0,5cm

## Film details

### Film Type

Polyolefin

### Width

450mm

### Thickness

19µm

### Features

Non-irradiated, 100% recyclable according to SPI 4 / LD-PE standard

# Discover the details of this application

## Entry tape on wheels

To facilitate the positioning and movement of the entry tape.

## Lowered guides

To ensure that the product does not escape.

## Automatic product spacing

Thanks to a separate management of the input conveyor speeds, the products are automatically spaced.

## Speed control of the conveyor by PLC

This solution allows for the optimization of processes, reducing times and ensuring reliable and precise production.

## Product compression kit

This optional, by reducing the amount of air inside the bag, is recommended for those who need to package without heat shrinkage or for those who need to package very light and delicate products during the heat shrinkage phase.

## Tunnel 50 Twin

Designed to meet the high-speed packaging needs of products that require secure and aesthetically optimal packaging.

# Discover the Pratika MPE X1 automatic shrink wrapping machine

## The best highlights

- Simple and functional **design**
- **Front and rear** opening for easy access
- USB port for **saving product settings** and updates
- **Servo-assisted** sealing bar
- **Motorized** film opening triangles
- **Increased entry belt** to facilitate standard loading operations
- **Extractable cart for reel** positioning at the back
- Remote **teleassistance** (optional)
