

# activaAir® BP4000

## Datasheet

**activaTec®**  
PACKAGING INNOVATIONS

Item number	BP4000
Weight	6 kg
Dimensions (mm)	l 315x w 300x h 315
Production speed	8-15 m/min
Voltage	180 W
Supported film thickness	13 - 40 µ
Cushions	✓
Mats	✓
Pedal	✓
Sensor	✓

## Air cushion machine activaAir – BP4000 – BASIC

Our air cushion machine, also called air cushion machine, combines modern design and high functionality, as well as flexibility and ensures a clean packing result. You can produce both air cushion pads and air cushion mats with the BP4000. The processing speed can be adjusted between 8 and 15 metres per minute.

The machine produces bubble cushions and mat films with roll lengths of 700 metres and 1500 metres. The BP4000 is particularly recommended for medium-sized companies with a parcel volume of several 1,000 parcels per day.
